

Pre-Class "External Brain" Assignment Rubric

Student Name: _____

Chapter and Sections: _____

Date: _____

	5 points	4 points	3 points	2 points	1 point	Earned
Content	All requested content has been included.	Only one small part of the content has been omitted.	Approximately 75% of the content has been included.	Approximately 50% of the content has been included.	Less than 50% of the content has been included	
Guidelines & Citations	All guidelines have been followed perfectly , including at least one citation for original source of information.	One small portion of the guidelines has not been followed For example: one citation may be missing.	No citations appear on paper , and/or more than one portion of the guidelines have not been followed.		Plagiarism of information is suspected based on the poor use of paraphrasing , or information being copied directly from another source.	
Design, Aesthetics, & Effort	The document submitted is well designed, functional and organized . It will be a good resource for studying and learning.	The document submitted is somewhat functional and organized but may be lacking in aesthetics or design, and therefore, is not the best possible resource for learning and studying.	The document submitted is no more than fair in its quality and design. It is readable and somewhat organized, although it is not a good resource for future learning and studying.			
If the assignment includes problems then the following is also included in the grading:						
Problems	Problem is set up correctly. Free body diagram (if applicable) is clear. All required equations are shown. Work is clear and easy to follow. Solution is correct.	Only ONE small part is not set up correctly. For example FBD might be missing labels, steps may be missing in equations, or there may be a mistake in the calculations.	Approximately 75% of the problem is set up correctly. For example, FBD may be missing labels and equations are not set up correctly. Or student skips straight to solution without showing work.		Problem is not set up correctly . FBD is not shown, equations are not written out, student skips straight to a solution without showing work.
